Subject: Applying for Full Stack Developer position

Dear sir,

I am interested in applying for the Full Stack Developer position at Aba Data. I have completed my bachelor's degree in computer science and engineering from American International University, Bangladesh and I believe I am capable for this role because I possess hands-on experience in both frontend and backend development, along with a proven ability to build and deploy real-world applications.

I developed two full-stack Blood Donation Management Systems using Java (Swing + MySQL) and C# (.NET), featuring donor registration, search filtering, and real-time availability tracking. I also developed E-commerce online selling website using Html, CSS, Js . I also learned Python, C++, HTML, and CSS. I practiced problem solving in cpp on codeforces. All my projects are uploaded to GitHub.

I am particularly interested in joining Aba Data company because of its strong reputation for delivering innovative IT solutions and enterprise software services. The opportunity to contribute to your development team while learning from experienced professionals would be an excellent platform for my career growth.

I would appreciate the opportunity to discuss how my knowledge and enthusiasm for software development can contribute to your organization. Thank you for considering my application. I look forward to hearing from you.

Sincerely

Tonmoy Chakrabarty Joy
Dhaka, Bangladesh
